

ID	Description	Preconditions	Steps	Expected result	Status (Pass/Fail)
TC_LOGIN_01	Verify a standard user can log in and is redirected to the inventory page.	Valid username (standard_user) and password (secret_sauce) exist.	1. Navigate to the login page. 2. Enter valid username. 3. Enter valid password. 4. Click the 'Login' button.	User is successfully logged in and redirected to https://www.saucedemo.com/inventory.html. The inventory page header and product list are displayed.	Pass
TC_LOGIN_02	Verify the system displays an appropriate error message for invalid login attempts.		1. Navigate to the login page. 2. Enter an invalid username (e.g., invalid_user). 3. Enter an invalid password (e.g., wrong_pass). 4. Click the 'Login' button.	Login fails. The error message "Epic sadface: Username and password do not match any user in this service" is displayed.	Pass
TC_LOGIN_03	Verify that a locked-out user (locked_out_user) cannot log in.		1. Navigate to the login page. 2. Enter the locked-out username. 3. Enter the valid password (secret_sauce). 4. Click the 'Login' button.	Login is blocked. The error message "Epic sadface: Sorry, this user has been locked out." is displayed.	Pass
TC_CART_01	Verify a user can add a single product to the shopping cart.	User is logged in on the inventory page.	1. Click the 'Add to cart' button for any product (e.g., "Sauce Labs Backpack"). 2. Click the shopping cart icon in the top-right corner.	The shopping cart badge updates to '1'. The cart page displays the exact product that was added, with the correct name and price.	Pass
TC_CART_02	Verify the cart badge accurately reflects the total number of items added	User is logged in on the inventory page.	1. Click 'Add to cart' for 3 different products. 2. Observe the shopping cart icon.	The shopping cart badge displays the number '3'. All three items are listed on the cart page.	Pass
TC_CART_03	Verify a user can remove an item directly from the shopping cart page.	User has at least one item (e.g., "Sauce Labs Backpack") in the cart.	1. Navigate to the cart page. 2. Click the 'Remove' button for the item.	The item is removed from the cart list. The cart badge updates accordingly (or disappears if the cart is empty).	Pass
TC_CHECKOUT_01	Verify the complete end-to-end purchase flow from login to order confirmation.	User is logged in with at least one item in the cart.	1. Go to the cart page. 2. Click 'Checkout'. 3. On the checkout information page, enter valid details (First Name, Last Name, Zip/Postal Code). 4. Click 'Continue'. 5. On the overview page, verify item and price summary. 6. Click 'Finish'.	User is taken to the checkout complete page (/checkout-complete.html). The success message "Thank you for your order!" is displayed. The cart is empty (badge is gone).	Pass
TC_CHECKOUT_02	Verify the system validates mandatory fields on the checkout information page.	User is on the checkout information page.	1. Leave the 'First Name' field blank. 2. Enter valid data for Last Name and Zip Code. 3. Click the 'Continue' button.	The user is not allowed to proceed. An error message "Error: First Name is required" is displayed.	Pass
TC_FILTER_01	Verify the product sorting functionality works correctly.	User is logged in on the inventory page.	1. Click the sorting dropdown (filter). 2. Select "Price (low to high)".	The product list is reordered. The first item displayed has the lowest price, and the last item has the highest price.	Pass
TC_LOGOUT_01	Verify a logged-in user can successfully log out from the burger menu.	User is logged in on any page inside the application (e.g., inventory page).	1. Click the burger menu (☰) in the top-left corner. 2. Click the 'Logout' link in the menu.	The user is logged out and redirected back to the login page (/). The login form is displayed.	Pass
TC_NAV_01	Verify the 'Continue Shopping' button on the cart page works correctly.	User is on the cart page.	Click the 'Continue Shopping' button.	User is navigated back to the inventory page (/inventory.html). The cart badge and its state are preserved.	Pass
TC_PRODUCT_01	Verify that clicking a product name or image navigates to a details page with correct information.	User is logged in on the inventory page.	Click on the product name or image.	User is taken to the product's detail page (/inventory-item.html?id=...). The page correctly displays the product's name, description, image, and price. An 'Add to cart'/'Remove' button is present.	Pass
TC_CHECKOUT_03	Verify that the total price on the checkout overview page is calculated correctly (Item Total + Tax).	User is logged in and has proceeded to the 'Checkout: Overview' page with at least one item in the cart.	1. On the overview page, note the Item Total value. 2. Note the Tax value. 3. Note the Total value. 4. Manually calculate: Item Total + Tax.	The displayed Total value matches the result of the manual calculation (Item Total + Tax). The values are formatted as currency (e.g., \$).	Pass

TC_UI_01	Verify that clicking "Add to cart" changes the button text to "Remove" for that specific item, and the change is consistent.	User is logged in on the inventory page. Cart is empty.	1. For any product (e.g., "Sauce Labs Bolt T-Shirt"), verify the button initially shows "Add to cart". 2. Click the "Add to cart" button for that product. 3. Observe the button text for the same product. 4. Observe the button text for a different product that wasn't clicked.	The button for the clicked product now displays "Remove". The button for all other products still displays "Add to cart". The shopping cart badge updates to '1'.	Pass
TC_SECURITY_01	Verify that a user cannot bypass the checkout flow by directly navigating to the order confirmation page URL.	User is logged in. Cart can be in any state.	In the browser's address bar, manually navigate to https://www.saucedemo.com/checkout-complete.html	User is not shown the "Thank you" page. Instead, the application should either: Redirect the user back to the inventory page, OR Display an error message/blank page	Fail
